### **Our Story**

iEdge - Digital Business Cards is a division of FutureSoft India Pvt. Ltd: An all-rounder enterprise software development company, founded in 1988, that believes in making IT happen.

One of our many objectives was to join the realm of digital business cards, and we succeeded in doing so. We aimed to create a product that promotes worldwide connections while fostering the use of technology over paper.

iEdge helps businesses around the world connect, share information, and manage their contacts more effectively. This cutting-edge solution builds your business world uniquely while turning your meetings into leads.

### **What are we known for**

**Communication**

**Exceeding Expectations**

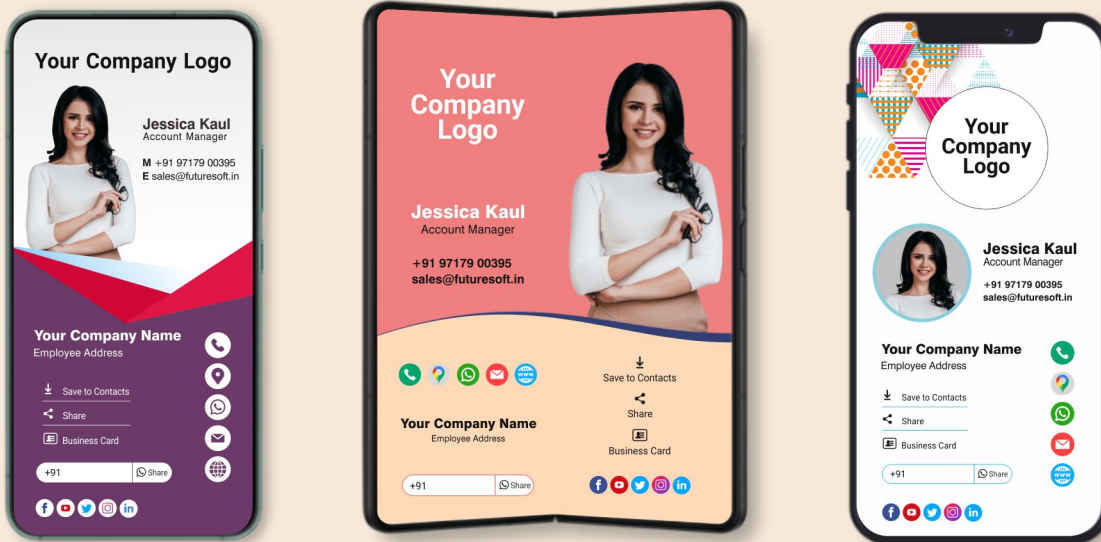

**Experienced Team**

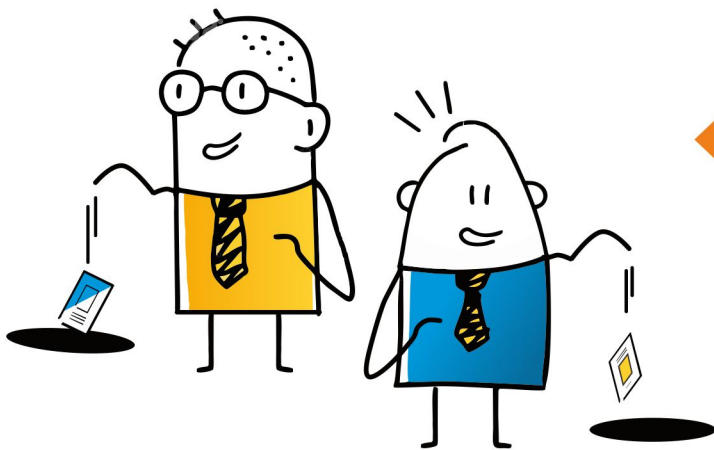

## What is a Digital Business Cards?

Digitalization is advancing networking. The availability of digital business cards stands out among the myriad digital platforms. They are a rapid and efficient way to exchange and save business contact information, and more. They are unique to you, contain your information, and may be as specific or broad as you like.

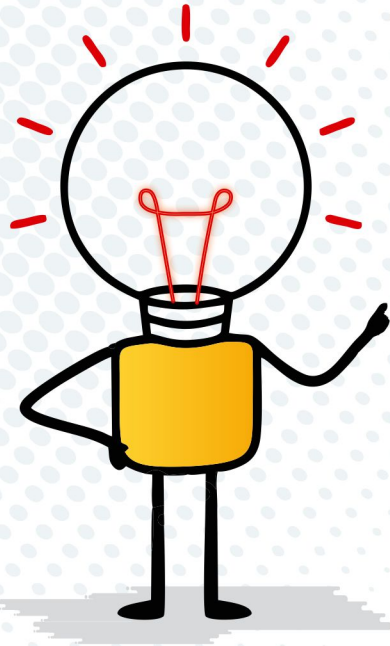

## Why switch to Digital Business Card?

◀ Studies have revealed that within a week, **88%** of paper cards go in a bin. Which means losing potential business.

Moreover, with a paper card: ▶  
You can only add **limited information**  
Must **reprint** to update the card details  
Can be shared only through an **in-person** meeting  
Not contribute to the **environment**

## Take your business Anywhere and Everywhere with **Digital Business Cards**
